

KEY BENEFITS

The Uccello Kettle is a safe and elegant assistive technology, that makes handling boiling water safely seem effortless. It opens up a world of confidence and independence for anyone who wishes to handle boiling water safely.

Form & Functionality

Unlike other kettles and kettle-tippers, the circular shape of the Uccello Kettle, combined with its rotating cradle, moves around the body of water to assist the flow of the pour, so you don't have to lift, strain, balance or aim.

Perfectly Positioned Handle

The positioning and shape of the ergonomically-designed Uccello handle means weight is distributed across the entire arm, not on fingers & wrists, which makes it easier to handle comfortably.

Easy-Touch Lid

While most kettles require that you awkwardly lift and hold open the spout while refilling, the Uccello's one-touch-to-open hinged lid, requires the lightest of touches to tap open or close.

Safe & Sturdy Base

Uccello's detachable water body vessel sits comfortably within a sturdy base that has the added safety of non-slip feet for further stability of pour.

Elegant Yet Practical Design

The black and white contrast design of the kettle colours helps individuals with dementia and low visibility differentiate the important parts of the kettle, including the easy-touch lid button. This elegant feature is also a safety feature.

Tapered Spout

From first to last drop of boiling water, the tapered design of the spout ensures water is targeted to the same spot every time, without the splashing, inconsistency or lack of control experienced with ordinary kettle pours.

With so much peace-of-mind – including a wide opening for easy filling, quiet boiling and auto shut-off protection from overheating – Uccello brings you the next level in safe, elegant and effortless assistive technology.

MAKING PEOPLE'S LIVES EASIER

Kettle Features

- Effortless pouring technology
- Stainless steel heating element with British safety technology and control
- Auto shut-off with overheating protection
- Ergonomic handle for easy handling
- Removable stainless steel anti-scale filter
- Water level indicator
- Power-on light
- Large non-slip base
- Quiet boiling

What Our Customers Say

"Purchased this kettle, absolutely brilliant. Don't know what I did before I bought it. Perfect for arthritic hands." - Sylvia

"It has totally changed my life. I can actually make a drink instead of having to ask my sister to pour the water out. I would recommend it. Especially if you have arthritis like me and can't use a normal kettle, this is perfect." - Cassandra

"I absolutely love this kettle, it's helping my husband enormously, he's got Parkinson's disease and some days the shaking is awful and the idea of trying to make himself a cup of tea is usually so difficult until now... this kettle is amazing, I also love the look of it. I would highly recommend it." - Kim
